It's been a journey working for the State Labs. Thanks to Paul Elvin for hiring me. I truly enjoyed serving the people of Massachusetts. I gave my best with integrity and great effort.

I enjoyed the great relationships that I developed here. I even appreciate the many challenges and that I have experienced during my career here because they have caused me to grow. These struggles have helped me become stronger and learn to love to a greater capacity. It's easy to be your best when the situation is great, the true test of your character is what you do in times of storms! Closed doors are really openings to better paths. So be encouraged. ☺

I will enjoy the summer with my children, my husband, and brush up on some education and dreams that I have put on hold. ☺

I leave sending you blessings and prayers. Keep up the hard work for the Commonwealth. Never lose sight of what is really important in life. The true jewel to attain is in the joy of a life in freedom, love, goodwill, and leaving a positive imprint so that others will benefit. You only have one life. Use it carefully; enjoying friends and family, when it's done, it's done.

Top things I'll miss: chats in the elevators, lounge time in the lactation "lounge", the isolation rm in TB (sweet tranquility), Alex, Arthur, and Dr. Hans great baking, and Paul Borne's trivia

Top things I won't miss: hot temps in the lab, gloves that break, fire drills in the cold, and the cargo elevator.

Please say good bye to anyone I missed by mistake.

Bye!!!

☺
